Professional Summary

Quality Assurance professional with 6 years of experience ensuring software quality across web, mobile, API, database, and data-driven applications. Skilled in functional testing, SQL and Databricks data validation, defect management, and Agile methodologies. Proven ability to support successful releases, collaborate with cross-functional teams, and drive continuous quality improvement across international projects.

Core Competencies

Test Strategy & Planning | Functional & Regression Testing | API & Database Testing | Data Validation & Data Quality | Defect Management | Root Cause Analysis | Quality Metrics & Reporting | Risk-Based Testing | Requirements Analysis | Agile Delivery | Stakeholder Management | Cross-Functional Collaboration | Leadership & Mentoring | SDLC & STLC

Core Skills

Testing: Functional Testing, Regression Testing, Smoke Testing, API Testing, REST APIs Testing, Database Testing, E2E Testing, UAT, Integration Testing

Test Automation: Playwright, Cypress, TypeScript

Test Management: Test Strategy, Test Planning, Requirements Traceability, Test Case Design, Defect Lifecycle Management, Root Cause Analysis, Risk Analysis, SDLC, STLC

Data: SQL, Databricks, Data Validation, Data Quality Testing, ETL Validation, MySQL, PostgreSQL

Tools: Jira, Azure DevOps, Postman, Xray, Confluence, BrowserStack, Swagger, GitHub,

Cloud: AWS, GCP, Salesforce

Methodologies: Agile, Scrum, Kanban, BDD

AI: ChatGPT, GitHub Copilot, Claude, AI-assisted Test Case Generation

Additional: Power BI, Lucidchart, Android Studio, Xcode, IntelliJ IDEA

Key Achievements

- Led QA initiatives across 10+ international projects spanning the United States, Canada, Mexico, and Colombia.
- Coordinated testing activities within teams of up to 18 members across Agile environments.
- Designed and executed test coverage for web, mobile, API, database, and data-driven applications.
- Mentored QA team members and promoted knowledge sharing through onboarding support and technical presentations.

Professional Experience

Company : SoftServe

Client: GAF (May 2025 - Feb 2026)

Position: QA Lead

Project: Lead to Proposal Design (LTPD) – Roofing Company, USA

- Analyzed user stories and business requirements to define test coverage and validation strategies.
- Executed functional, smoke, and end-to-end testing across multiple environments.
- Created and maintained test plans, test cases, and quality reports to support release activities.
- Defined, tracked, and reported QA metrics to monitor product quality and testing progress.
- Coordinated end-to-end testing efforts within a QA team of 15–18 members.

Client: Teck Resources (Sept 2023 - Apr 2025)

Position: QA Senior

Project: Production Data Model (PDM) – Mining Company, Canada

- Designed and executed test scenarios and SQL queries to validate complex data models and business rules.
- Performed functional, API, and database testing using Azure DevOps and Databricks.
- Created comprehensive QA documentation, including test plans, test cases, and risk assessments.
- Tracked defects, analyzed testing results, and reported quality metrics to stakeholders.

Client: Teck Resources (Jun 2023 - Aug 2023)

Position: QA Senior

Project: Multi-Customer Platform (MCP) – Mining Company, Canada

- Analyzed business requirements and designed test scenarios to validate platform functionality.
- Created flow diagrams and traceability documentation to support testing activities.
- Executed UI testing and maintained defect documentation, including root cause analysis records.
- Collaborated with clients and stakeholders to communicate testing progress and quality results.

Client: Teck Resources (Oct 2022 - May 2023)

Position: QA Mid

Project: Alert & Messaging Service – Mining Company, Canada

- Created, maintained, and executed regression and API test cases to validate messaging workflows.
- Supported the design and improvement of manual testing processes.
- Monitored testing activities and reported quality metrics throughout the testing lifecycle.

- Validated API endpoints using Postman, Swagger, and Python-based testing approaches.

Client: Teck Resources (Jul 2022 - Sept 2022)

Position: QA Mid

Project: Web-based application - Mining company, Canada

- Reviewed user stories, requirements, and test conditions to identify testing needs and coverage.
- Designed, maintained, and executed functional test cases.
- Performed UI, API, database, regression, and performance testing activities.
- Monitored defects, analyzed testing results, and documented quality findings.
- Prepared test summary reports to communicate testing outcomes and release readiness.
- Mentored new team members and supported knowledge-sharing initiatives.

Company: Globant

Client: Modere (May 2022 - Jul 2022)

Position: QA Mid

Project: E-commerce for the sale of healthy products, USA

- Created and maintained Gherkin-based test cases to support behavior-driven development practices.
- Performed web, API, and database testing to validate business and technical requirements.
- Executed UI/UX testing to ensure usability and consistency across customer journeys.
- Managed and maintained QA documentation within client-specific tools and platforms.

Client: La Liga Mx (Dec 2021 - May 2022)

Position: QA Mid

Project: Official mobile app from scratch, Mexico

- Collaborated within Agile and Scrum teams to support quality assurance activities throughout the development lifecycle.
- Created and maintained Gherkin-based test cases aligned with business requirements. • Validated functionality across iOS and Android platforms using physical and virtual devices.
- Performed exploratory, smoke, functional, look-and-feel, retesting, and regression testing activities.
- Managed QA documentation using Confluence and other project tools.
- Delivered a technical presentation on device virtualization and mobile testing best practices.

Client: Disney (Sept 2021 - Nov 2021)

Position: QA Mid

Project: Amusement park ticket management, USA

- Collaborated within Agile and Scrum teams to support ticketing platform quality initiatives.
- Performed web and mobile testing to validate user-facing functionality and workflows.

- Supported Service Desk activities and issue management processes.
- Validated guest-facing experiences to ensure usability and business requirement compliance.
- Facilitated daily meetings and client-facing discussions regarding testing progress and quality status.
- Created and maintained project documentation in Confluence.
- Served as a primary point of contact for QA-related support and team coordination.

Client: Disney (Jul 2021 - Sept 2021)

Project: Internal sales support tools, USA

- Collaborated within Agile and Scrum teams to support quality assurance processes.
- Performed exploratory, smoke, regression, web, API, and database testing activities.
- Designed testing workflows to improve consistency and efficiency across QA activities.
- Managed Jira artifacts, including user stories, defects, and supporting evidence.
- Created and maintained Gherkin-based test cases.
- Defined and tracked sprint quality metrics to support project visibility and reporting.
- Served as a point of contact for QA support and team collaboration.

Habla Creativo

Position: QA Jr (Sept 2020 - Jun 2021)

Digital strategies for real estate companies, Colombia

- Worked within a Kanban framework to support software quality and project delivery.
- Created user documentation and client guides to facilitate platform adoption.
- Performed web, database, and UI/UX testing activities.
- Validated digital marketing initiatives across Facebook, Instagram, Google, and LinkedIn platforms.
- Supported SEM activities and campaign-related quality validation.

TecnoSoluciones

Position: QA Jr (Aug 2018 - Aug 2020)

Online Software Application Services Provider , Colombia

- Collaborated on mockup design activities to support product development initiatives.
- Performed web testing and frontend validation using HTML and CSS.
- Interacted directly with clients to gather feedback and support project requirements.
- Contributed to content marketing, copywriting, and SEO initiatives.
- Supported digital advertising activities across Facebook, Instagram, and Google platforms.
- Created chatbot workflows and conversational flows to improve user engagement.

Education

- Analysis and Software Development – CENSA
- Audiovisual Communicator – Politécnico Colombiano J.I.C

Certifications

- *Testing with Generative AI (ISTQB), studying*
- AWS Certified Cloud Practitioner (CLF-C02) , 2026
- Certified Tester Foundation Level (ISTQB), 2023

Languages

- Spanish, Native
- English, B2 (upper-intermediate)
- Portuguese, elementary
